### **DETAILED ACTION**

1. This Office action is in response to Application No. 10/037,674, filed on 10/22/2001.
2. Claims 1-33 are pending.

### ***Claim Rejections - 35 USC § 102***

3. following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. Claims 1-33 are rejected under 35 U.S.C. 102 (e) as being anticipated by Barnett et al (U.S. Pat. No. 6,369,840).

As per claims 1-2, 7-13, 15-33 discloses a computer method/system for generating and displaying a calendar containing user-selected events from user-selected categories. A plurality of categories of events are provided, the method comprising of:

Receiving an event signal from a client device associated with the user, wherein the event signal comprises data that is descriptive of a user interaction with a server device of the computer network (see., abstract, col 3, lines 8-61, specifically wherein said once the user has logged in, he or she can enter any of several different areas of the system, in order to perform different types of activities. A event directory allows the user to select categories of events that are of interest... col 9, lines 1-15);

Retrieving a set of instructions that correspond to the data included in the event signal;  
extracting the data from the event signal in accordance with the retrieved instructions;

Art Unit: 3621

storing the data in a database (see., col 8, lines 60-67, col 9, lines 1-15, specifically database 112).

As per claim 3, Barnett discloses the claimed method wherein said additionally comprising extracting the item of data that is denoted by the tag identified in the instructions (see., col 8, lines 60-67, col 9, lines 1-15, specifically wherein said information allowing the system to identity him or her. In response to the user entering the information, system 100 retrieves centrally stored user-specific information).

As per claims 4, 5, 14, Barnett discloses the claimed method in said the event signal includes an event ID and wherein retrieving a set of instructions that correspond to the data included in the event signal comprises retrieving a set of instructions that correspond to the event ID (see., col 8, lines 60-67, col 9, lines 1-15, specifically wherein said information allowing the system to identity him or her. In response to the user entering the information, system 100 retrieves centrally stored user-specific information).

As per claim 6, Barnett discloses the claimed method wherein a gateway module extracts the data from the event signal, and additionally comprising distributing a plurality of received event signals among several gateway modules (or filed 402 and password field 403) in order to balance a load of received events signals among the several gateway modules (see., col 8, lines 60-67, col 9, lines 1-15, specifically wherein

said information allowing the system to identity him or her. In response to the user entering the information, system 100 retrieves centrally stored user-specific information).
